

Calculate Commercial loads in very little time with this innovative software. Input multiple systems and zones with a few button clicks. This program incorporates all of the easy to use features as our popular AccuLoad Software utilizes.

Commercial Load Calculations

Knowing how to correctly size loads in commercial applications can be tricky with all the “extras” involved. With our program, you take the guesswork out of the equation. In many instances, the internal load will be greater than the load for the entire building. With our program, you have close to 400 internal gain options to choose from that automatically calculate:

- Motors
- Computers
- Occupants
- Plants
- Food Service Equipment
- Misc Office Items
- Lighting
- Animals

Some features of the AccuComm include:

- Add Walls, Windows, Doors, etc..with ease
- Add Zones and/or multiple systems
- Easy setup requires minimal time
- Globally change windows, walls, etc...
- Point & click design allows quick entries
- Incorporates drag and drop features
- AccuCheck feature checks for input errors
- Over 350 Internal Gain Load Options
- Many commercial construction values
- Calculate loads at 9am, 12pm, 3pm, or 6pm
- Automatic Update feature included
- **Unlimited Licensing**
- **Free Technical Support**
